**Phone:** 9021529933 | **Email:** aniketkamalkar@gmail.com | **Address:** Bengaluru, Karnataka.

## SUMMARY

Advanced UiPath Certified RPA Developer bringing 2 years of expertise in Software Automation with skills in end to end development, code debugging, release management, team leadership and management and problem solving. Innovative and creative in developing fresh designs to meet current, forecasted and client needs. Works great with technical and non-technical teams to coordinate on-time, quality releases. Effectively manages assignments and team members. Dedicated to self-development to provide expectation-exceeding service.

## EDUCATION

- **BE in Mechanical**  
Kolhapur Institute Of Technology, Kolhapur  
(Under Shivaji University, Maharashtra) 68% (Aggregate) 2020
- **PUC**  
Vivekanand College, Kolhapur 80% 2016
- **SSC**  
Shri. Maisaheb Bwadekar Madhyamik Vidyalaya 93% 2014

## SKILLS

- **Technologies** : C, C#, MS SQL
- **Tools/IDE** : UiPath Automation Tool, Microsoft Visual Studio 2017/2019, Microsoft SQL Server Management Studio, Version One, Site scope Monitoring Tool, Jenkins
- **Methodologies** : Agile, waterfall
- **Development** : SDLC
- Multitasking Abilities
- Leadership and management
- Analytical and Critical Thinking
- Problem-Solving

## EXPERIENCE

**Software Engineer ► SLK Software Pvt Ltd, Bangalore**

**February 2021 to Current**

- Overall 2 years of IT experience as well as Robotics Process Automation (RPA).
- Worked on end to end automation processes. Proficient in all phases of SDLC such as Analysis, Design, Development, Integration, Implementation and Maintenance.
- Built Automation Modules as per requirement of the project using UiPath as well as C#.
- Built reusable libraries in C# as custom activity to use in UiPath.
- Experience in Web, Desktop applications, Orchestrator, JSON parsing, Email ,Excel and Data table automation, Document understanding, Action center etc. using UiPath Studio.
- As a part of Migration Team, worked on IE to Chrome migration, Modern Folder conversion from Default Orchestrator Folder to Modern Orchestrator Folder of the processes.
- Worked as L3 developer for ARC where fixed too many bugs/errors from production process, done enhancement, improved efficiency of automation and also done deployment within short period of time.
- Closely worked and built good relationship with client. Collected and examined user feedback to improve capacity of software and provided solution frequently.
- Participating in daily Agile Activities.
- Highly result oriented and pro-active, proven abilities to learn new technologies quickly and Implementing them successfully in production
- Strong analytical, problem solving & programming skills, cohesive team worker with exceptional Planning & execution skills
- presentations to Line of Business and higher authority of company.
- Provided weekly detailed project reports to keep manager informed on milestones and updates.
- Demonstrated ability to work under tough deadlines/pressure

## PROJECTS INVOLVED

### 1. LockBox : (May 2021 - January 2022)

**Project Details :** LockBox is a payment method in USA for paying the bills through checks. In this automation we used to get invoices, checks, stubs in image format and we get data points of each batch through their own ImageRps application. With this, we used to validate and match the checks and stubs fields and that helped the operators to reduce their work and efforts by 50% -60%. In USA, this payment method used by many banks and their clients. It was one such process handled by our Organization to make an impact in US banking sector.

**Roles and Achievements:**

- Worked on high level UiPath concepts like document understanding , JSON parsing, Json format creation and conversion, Sql database and AI-ML.
- Developed new custom activities in UiPath using C# which were not available in UiPath.
- Developed the automation code, debugged and fixed major issues within critical deadline.
- Gave Code walk through presentation to tech lead, line of business people.
- Helped tech lead in SDD creation.

### 2. CBP Wired labeling Update To Frontier :(January – April 2022)

**Project Details :** This is banking process in which, client has update user details in the Frontier application to perform further processes of CBP process. We automated this process to reduce repetitive work, to reduce errors and increase the speed of work using bot. This automation helped client update the correct user data into their application in very minimal time.

**Roles and Achievements:**

- Developed the end to end unattended automation alone.
- In this process, worked on UI automation, Excel automation, Datatable activity.
- Worked in design, development, unite testing, integration, implementation.
- Done deployment of the process also.

### 3. ARC L3 Development : (April 2022 – August 2022)

**Project Details :** Worked as Lead for ARC Development Team, where fixed too many bugs/errors from production process, done enhancement, improved efficiency of automation and also done deployment within short period of time. Team was piled up with approximately 30-40 processes among which I have handled approximately 8 to 10 processes. Also closely worked and built good relationship with client. Collected and examined user feedback to improve capacity of software and provided solution frequently.

**Roles and Achievements:**

- Handled many process at a time and provided root cause analysis and provided solution in given deadline.
- Within short period of time, able to analyze the cause of Error, code fixe and deployment of code to production.
- Done code enhancement and process performance and improvisation changes in code and deployed it successfully, which made BOT more effective and faster.
- Provided satisfactory solutions to client on their concerns regarding process and made good relationship with client.
- Received the “Stellar Team Award” for the best performance by the team.

### 4. Migration Process: ( August 2022 –November 2022)

**Project Details :** In this project, we migrated the few processes from IE to Chrome, along with the modern folder conversion of the bots from Default Orchestrator folder to Modern Orchestrator Folder with the enhancement. In this project we have worked on Tenant and Server migration also.

**Roles and Achievements:**

- Worked as lead for this project.
- Worked on IE to Chrome migration with enhancement.
- Worked on Modern folder conversion of the processes.
- Tenant migration, Functional Id creation and server change while doing migration.

## 5. CBP Removal of Duplicates : (November 2022 – Present)

**Project Details :** This is the banking process in which, bank gets too many notices through email, some of which have been sent repeatedly, which lead to duplication of notices in mail box, so bank needs go through each an every notices and remove duplicates before processing further. This automation is for removing major amount of duplicate notices and reduces the work of bank operator by 40% to 50%.

### **Roles and Achievements:**

- Worked on UiPath concepts like UI automation, RegEx, OCR extraction, Excel automation, Datatable activity
- Worked on critical UI automation of core java application of bank.
- Where we used the multi bots for faster processing.
- Done lot of enhancement also after.
- Developed the automation code, debugged, fixed major issue and done deployment also.
- Done lot of business communication with client to understand the requirement and reduce most of the duplicates.

## CERTIFICATION

- **UiPath Certified Advanced RPA Developer v1.0 (UiARD)**

## AWARDS AND ACHIEVEMENT

- **Stellar Team Award**
- SLK arranged Technovanza Competition (Tech fest of SLK)
  1. **Winner of Technical Treasure Hunt**
  2. **Overall 1<sup>st</sup> runner up for team performance.**

## LANGUAGE

- English
- Marathi
- Hindi

## HOBBIES AND EXTRA SKILLS

- Reading
- Playing Competitive sports
- Gyming ( **“Advance Sports Nutrition and Dietician Certified” Nutritionist and Trainer**)
- Exploring new places
